Understanding your formulary

What is a formulary?
A formulary is a list of prescribed medications chosen by your plan for their safety, cost and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. The formulary includes both brand-name and generic prescription medications approved by the U.S. Food and Drug Administration (FDA).

How do I use my formulary?
You and your doctor can consult the formulary to help you select the most cost-effective prescription medications. This guide tells you if a medication is generic or brand name, and if special rules apply. Bring this list with you when you see your doctor. If you have questions on how your medication is covered, call the Customer Service number on the back of your ID card or visit **firstcarolinacare.com**.

About this formulary
Where differences exist between this formulary and your benefit plan documents, the benefit plan documents rule. This may not be a complete list of medications, and not all medications listed may be covered by your plan. Please look at the benefit plan documents provided by your employer or plan sponsor for full details.

What are tiers?
Tiers are the different cost levels you pay for a medication. Generally, the higher your medication's tier, the more you'll pay out of pocket for it.

When does the formulary change?
- Medications may move to a lower tier at any time.
- Medications may move to a higher tier when a generic equivalent becomes available.
- Medications may move to a higher tier or be excluded from coverage during the year as other formulary alternatives become available.

When a medication changes tiers, you may have to pay a different amount for that medication.

Why are some medications excluded from coverage?
A medication may be excluded from coverage under your pharmacy benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

What if I don't agree with a decision about an excluded medication?
You (or your authorized representative) and your doctor can ask for a coverage request by calling the Customer Service number on the back of your ID card.

What is the difference between brand-name and generic medications?
Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less. Once the patent for a brand-name medication ends, the FDA can approve a generic version with the same active ingredients. If you choose a brand-name medication after a generic version is available, you may pay the brand-name copayment plus the cost difference between the brand-name and generic medication. These medications will have a comment saying “Brand penalty applies” in the notes section.

Over-the-counter (OTC) medications
An OTC medication may be the right treatment option for some conditions. Talk to your doctor about available OTC options. Even though these medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

What if my doctor writes a brand-name prescription?
If your doctor gives you a prescription for a brand-name medication, ask if a generic equivalent or lower-cost option is available and could be right for you. Generic medications are usually your lowest-cost option.

Reading your formulary

The formulary gives you choices so you and your doctor can determine your best course of treatment. In this formulary, brand-name medications are shown in UPPERCASE (for example, CLOBEX) and generic medications in lowercase (for example, clobetasol).

Tier Information

Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost. Your plan may have multiple or no tiers. Your plan may have less than 6 drug tiers with some of the tiers listed below combined and available at the same copayment. For closed-formulary or restrictive formularies select medications may be excluded unless an exception is requested and approved. Details of your pharmacy benefits can be found in your plan documents. Please note: If you have a high-deductible plan, the tier cost levels will apply once you hit your deductible.

Drug Tier	Drug Tier Description	Helpful Tips
Preventive	**Brands and generics used for preventive care**	No out-of-pocket cost. Deductible does not apply
Tier 1	**Preferred generics**	Low out-of-pocket cost
Tier 2	**Non-preferred generics**	Most generic drugs
Tier 3	**Preferred brands**	Many brands have lower-cost generic options
Tier 4	**Non-preferred brands**	Many brands have lower-cost generic options
Tier 5	**Preferred specialty**	May be limited to a specialty pharmacy
Tier 6	**Non-preferred specialty**	May be limited to a specialty pharmacy
General Medical (GM)	**Medical benefit**	Provided and administered in a doctor's office or hospital and not covered by the pharmacy benefit

Drug list Information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan determines how these medications may be covered for you.

AL	**Age Limit** – Based on government or manufacturer guidelines, these medications are only covered for certain age groups.
GD*	**Gender Dysphoria** – These medications may be covered at $0 under your specific plan. Please check your benefit plan documents.
PA	**Prior Authorization** – Your doctor is required to provide additional information to determine coverage.
PV	**Preventive** – These medications are covered at $0 under preventive benefit.
PV*	**Preventive*** – These medications may be covered as preventive care if you meet the guidelines based on your plan.
QL	**Quantity Limit** – Medication may be limited to a certain quantity.
ST	**Step Therapy** – Trial of lower-cost medication(s) is required before a higher-cost medication can be covered.
